

B113

5V Active Alarm Buzzer Driver Module

Specification:

Module describes a module using 9012 transistor drive 2 Operating voltage 3.3V-5V3 with fixed bolt hole for easy installation of four small PCB board size: 2.8cm * 1.3cm

Module Interface Description (3-wire) 1 + external 3.3V-5V voltage (can be directly connected to 5v and 3.3v SCM SCM) 2 - External GND3 out external microcontroller IO port
